

What's NEW in ProQuest Medical

ProQuest offers four excellent databases specifically covering medical research:

- 1 **ProQuest Medical Library™**
Clinical and biomedical full-text journals
- 2 **MEDLINE® with Full Text**
ProQuest Medical Library full-text journals plus the *MEDLINE Index*
- 3 **ProQuest Health and Medical Complete™**
ProQuest Medical Library plus additional consumer health full-text titles
- 4 **ProQuest Hospital Collection**
Includes *ProQuest Health & Medical Complete*, *ProQuest Nursing & Allied Health Source™*, *ProQuest Psychology Journals™* and *ProQuest Family Health*

NEW Lancet titles

Not only does ProQuest have aggregation rights to *The Lancet*, but we have now added three more titles:

- *The Lancet Infectious Diseases*
- *The Lancet Neurology*
- *The Lancet Oncology*

NB Also included in *ProQuest Nursing & Allied Health Source* and *ProQuest Pharma Collection*

NEW Clinical guidance content

We are pleased to announce our partnership with *PocketMedicine* to offer our medical subscribers exclusive access to clinical guidance in 2009. These include:

- Clinical references – guide of treatment options
- Treatment strategies – focus on management of disease
- Checklists – helps users make or confirm diagnoses

UPDATE Medical Evidence Matters

In 2008, ProQuest purchased the evidence-based medicine search engine *Evidence Matters* and renamed it *Medical Evidence Matters*.

Medical Evidence Matters is an evidence-based medicine search tool that draws information from hundreds of peer-reviewed journals to help users choose the best therapy options for patients with confirmed diagnoses.

Medical Evidence Matters is the only tool that can help find and synthesise – quickly – all the relevant published and peer-reviewed evidence to answer your clinicians' individual patient-oriented questions. Results are organised into summary graphs and tables – helping the clinician assess the evidence and determine the best form of treatment.

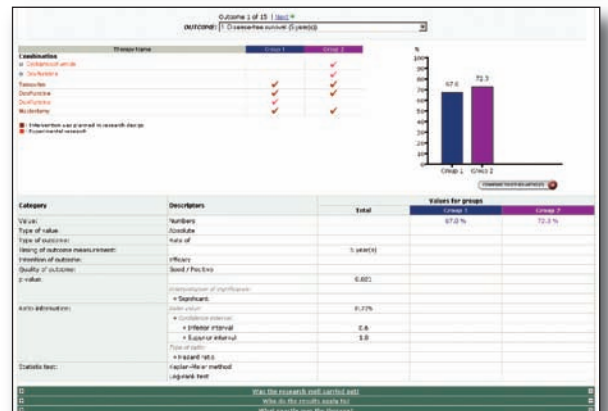

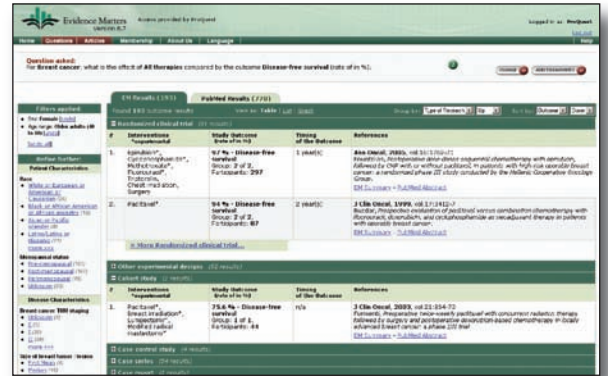

Medical Evidence Matters currently covers 10 subject areas including:

- Cardiology
- Endocrinology/Metabolism
- Gastroenterology
- Gynecology

- Neurology
- Oncology
- Orthopedics
- Pediatrics
- Respiratory Disorders
- Urology

Why choose *Medical Evidence Matters*?

- Recommended by healthcare professionals
- Impressive clinical credentials
- Development input from Harvard, McGill and other prestigious research centres and teaching hospitals
- Updated daily
- Less time reading means more time with patients
- Helps your clinicians find and compare the best treatments for their patients
- The only system that organises all types of evidence-based clinical research in a standardised, comprehensive way
